

APPENDICES FOR AI CHATLOGS

HOW TO INCLUDE YOUR AI CHATLOG TO THE APPENDICES?

Appendix 1 - Chatlog of Feedback on Issue

You need to make sure that you have the chat log available to you. Different AI tools will have different methods of providing you with information. You need to save the chatlog if the tool you are using does not support this feature natively.

1. Take a screenshot of the page with your question and the answer generative AI provides you with.
2. It is suggested that the chatlog be saved via a PC, to ensure that the size and formatting is visible in your appendices.
3. Make sure to title your appendix. Make sure to include the name of the AI tool and the purpose you have used it for. For example, "Appendix 1 - POE response for Issue Query".

Use the standard formatting for the appendices.
